Lion Head Jardinière

## Product Information

Part of the Classic Collection

Cast stone jardinière with lion heads and garland swag.

Although the Lion Head Jardinière is an exact replica of an antique purchased in France, it displays the hallmarks of nineteenth century British design. A garland swagged through the mouths of lion heads circles the planter, which is the perfect size to flank an exterior doorway.

This photograph highlights our three classic jardinières. The [Grape Motif Jardinière](#) sits atop the [Small Estate Display Column](#) on the left, with the [English Country Jardinière](#) displayed on the [Medium Estate Display Column](#). The regal [Lion Head Jardinière](#) rests on the ground.
